Classified List of Industries	23

INTRODUCTION

The Classification and Classified List of Industries are designed primarily for use in classifying industry returns obtained from the 1954 Census of the Commonwealth of Australia and should be used in conjunction with the companion volume, Index of Industries, 1954.

The content of these volumes is largely based on that of the 1947 Classification and Classified List, which they supersede. The revision has been made in accordance with the experience gained during the 1947 Census and recent sample population surveys conducted by this Bureau.

The Classification divides the whole field of industry into fourteen major industry groups, which, in turn, are divided into 52 sub-groups and 342 categories. Each category defines a branch of productive activity, trade or service.

In the Classified List the categories are shown in the same order as in the Classification. The individual industry descriptions which comprise each category are arranged in alphabetical order under the category title. The component descriptions define the category.

The category "Other" is used—

- (a) When the industry description is quite definite but no other appropriate category is provided to which it can be assigned. In such cases, the description is assigned to the "Other" category for the group or sub-group to which it most closely corresponds.
- (b) When the industry description is not precise enough to enable it to be assigned to any other category within a particular sub-group, but is defined sufficiently to allocate it to that sub-group.

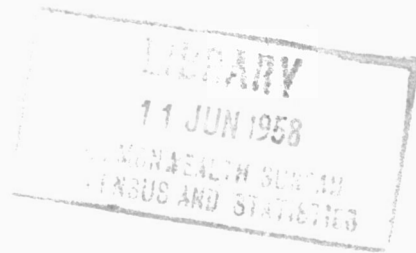

Certain industry descriptions appearing in the Classified List are followed by a qualification in brackets. Most of such qualifications are self-explanatory and " (n.e.i.) ", " (undefined) ", " (so described) " and " (no industry stated) " are used in the following sense:—

(n.e.i.).—Not elsewhere included.

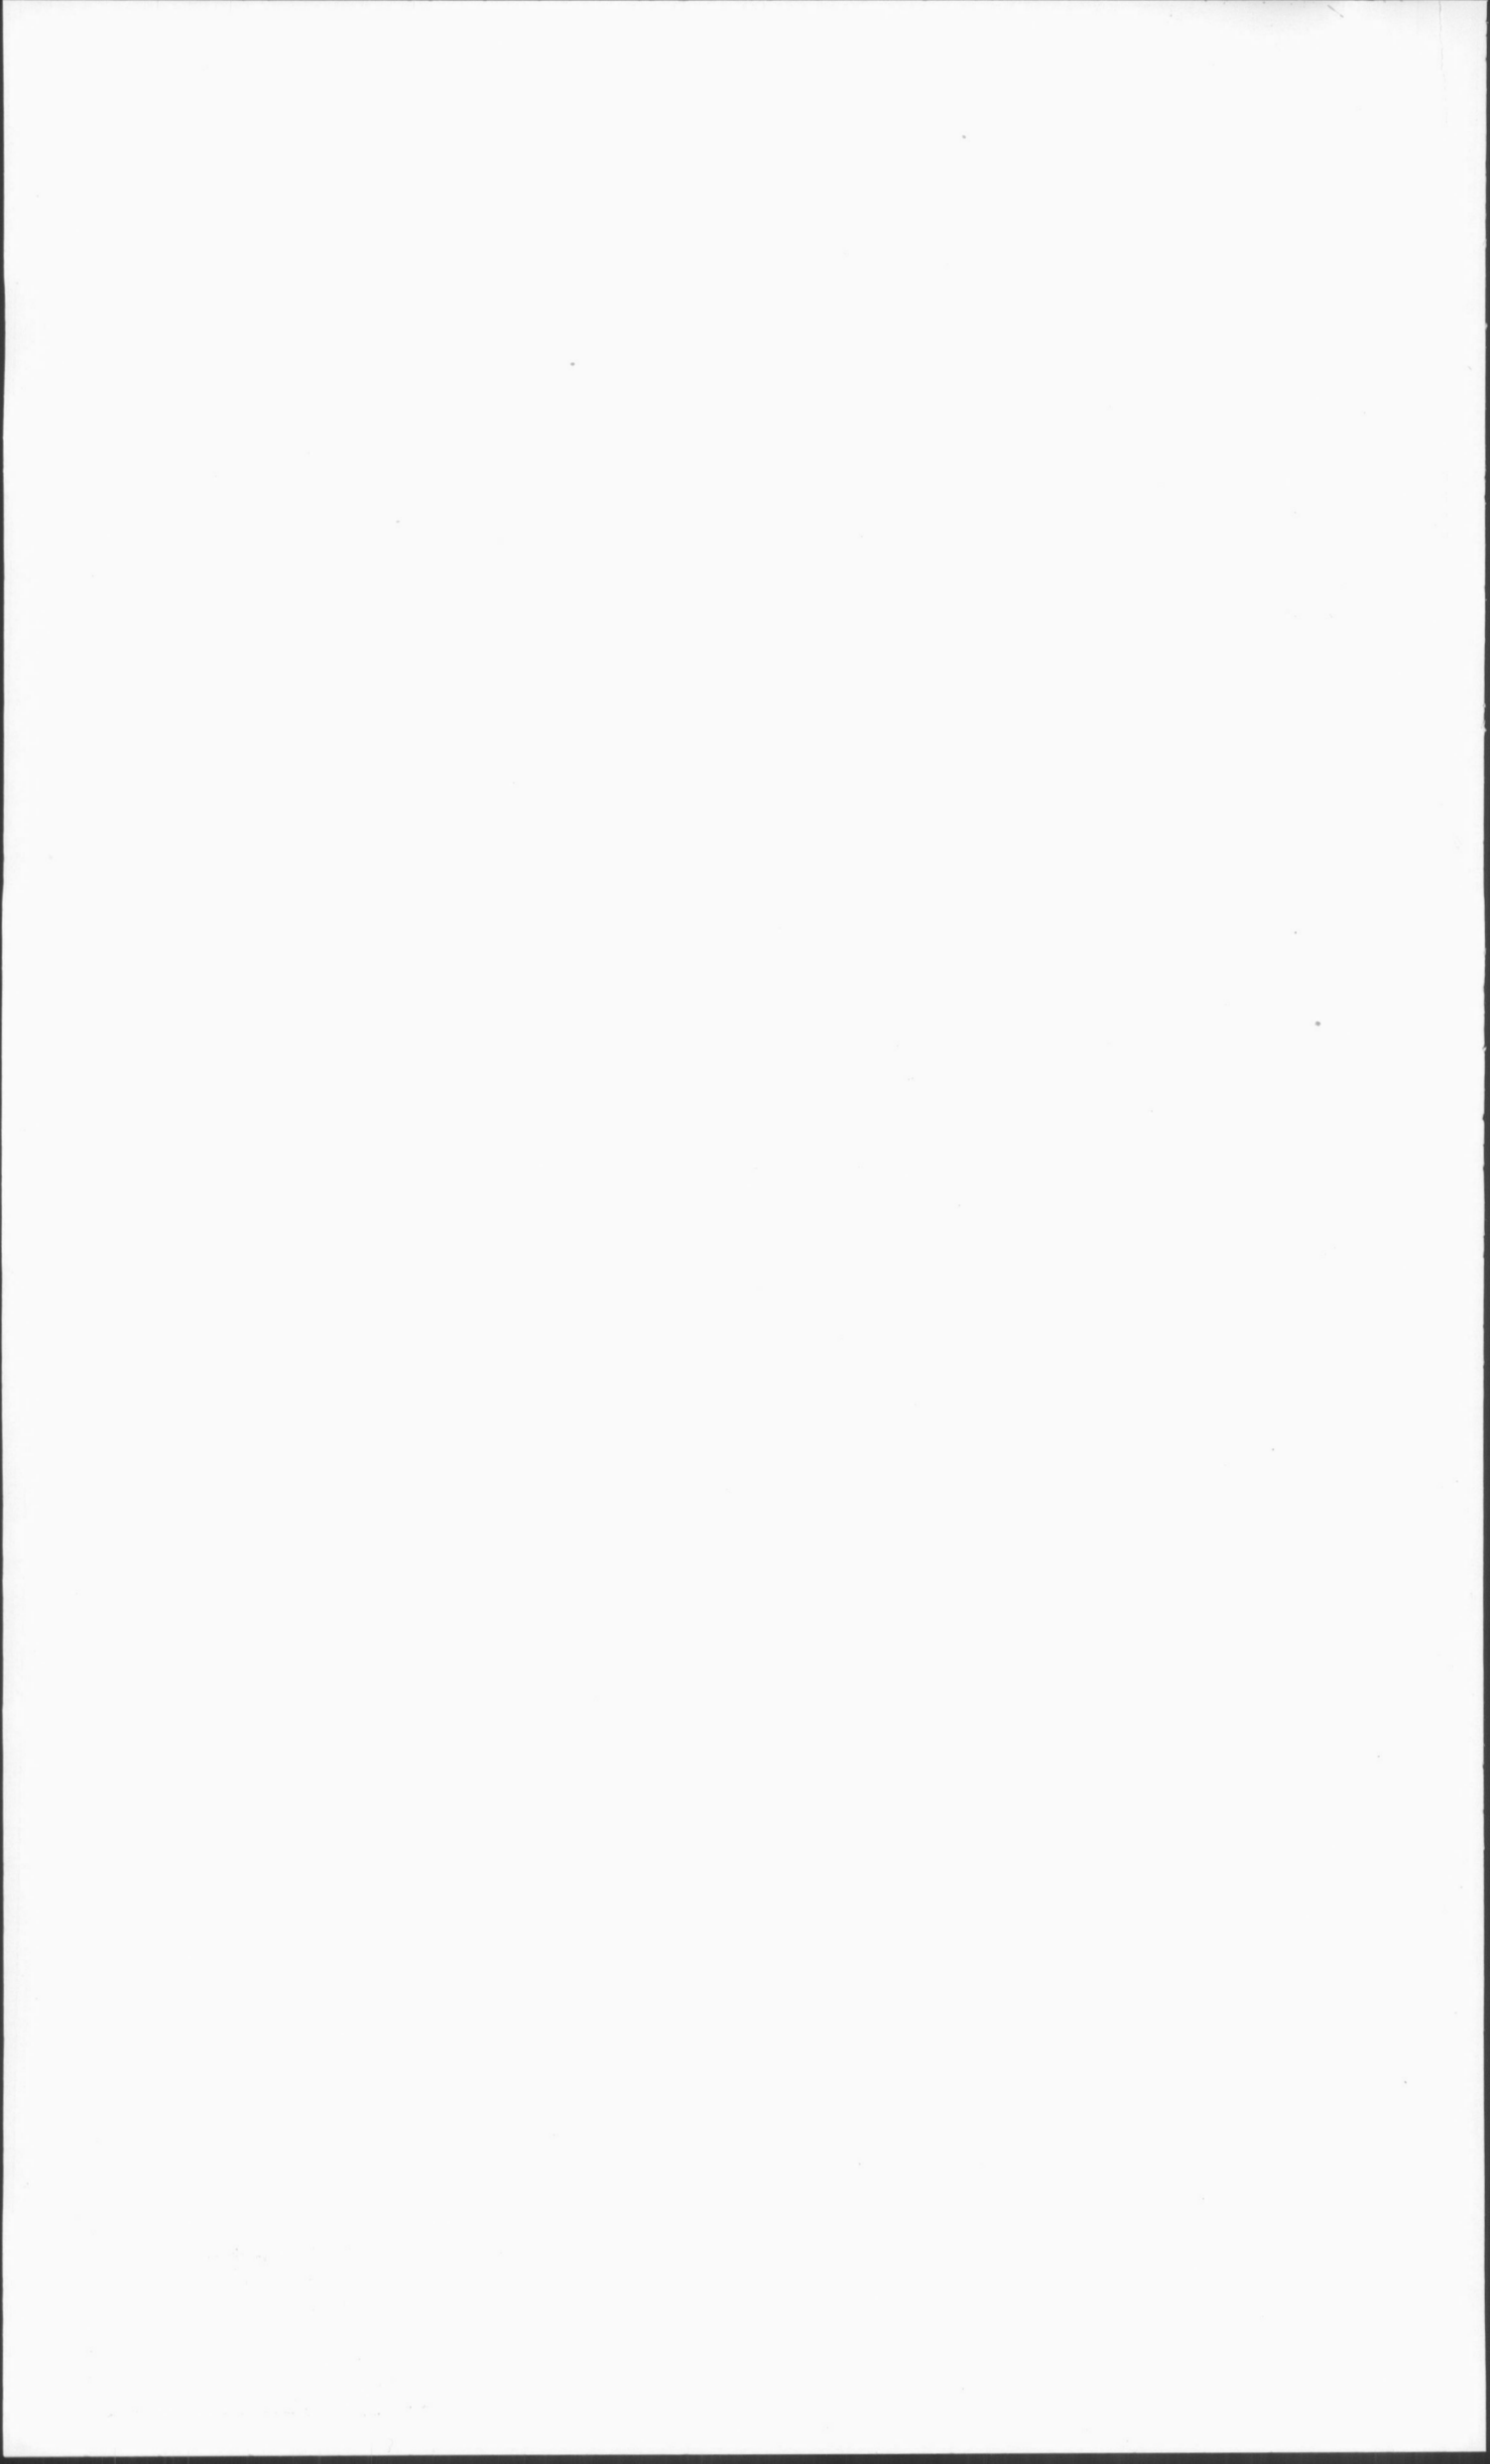

(undefined).—A reported industry description is not to be coded to the number appearing opposite an entry in the Index qualified by " (undefined) " if there is any evidence, either in the reported description itself or elsewhere on the Schedule, that will enable the description to be coded to another Index entry. For example, the reported description "Metal furniture making" must not be coded to the Index entry "360—Furniture making (undefined)" but to the entry "126—Furniture making, Metal".

(so described).—Where an Index entry is qualified in this manner, only reported descriptions with precisely the same or synonymous wording may be coded to the number appearing opposite the entry. For example, the reported description "Fruit-growing and poultry farming" must not be coded to the Index entry "020 Mixed farming (so described)".

(no industry stated).—Entries so qualified refer to cases where no reply has been given to the "Industry" or "Place of Work" question but the occupation reported is such that it can be reasonably assigned to an industry category.
